

Ty Du, Primary Infrastructure

Everybody at Walters UK Ltd would like to wish everybody within the Nelson Community a Merry Christmas and a Happy New Year

Community Benefits

Walters UK Ltd have been building relationships within the community of Nelson over the last few months. We have made donations towards the local sports clubs, community center and Llanfabon Church. We are proud to report we have worked closely with Nelson RFC to purchase a defibrillator, that will not only benefit the club but the whole community. We look forward to building new relationships in the new year and also maintain and build on our current partnerships.

Completed Works

Walters UK Ltd have undertaken vast amounts of earthworks during the scheme to date. We estimate that we have moved around 30,000m³ of material during the scheme to form the new roads, 2 new ponds areas and plateaus for the new commercial areas that form part of the development.

We have also undertaken extensive works to the existing water courses that currently pass through the site. We have installed 10 new culverts of which 5 are designed to be used by mammals such as otters. The installation of the culverts will allow the new road to be constructed throughout the scheme, whilst maintaining safe access for all wildlife.

Looking Ahead

In the new year we will be continuing with the earthworks within the site to finalise the new roads, plateaus and cyleway / footpath areas.

We will also be starting the S278 works on the A472 (Mafon Rd). As stated previously we will be carrying out the works in an efficient and effective manner to minimise disruption to all.

Communications

We encourage all feedback and communications during the course of the project and Walters will be employing a Public Liaison Officer for the duration of the scheme. If any person has a complaint regarding the works then we would like to be informed as soon as possible to allow us the opportunity to rectify them, so please do not hesitate to contact us if you have any queries or problems.
